

Carson Wargo, (240) 444-1409

This is not a comprehensive list of plants; it's just the ones most practical for greenhouse growth. Many of the large shade and fruit trees would be impractical to start in the greenhouse, as it would take a few years to reach transplantable size.

- **Bolded plants** are the ones we have had the highest success rate with!
- If there are any other valuable species that we should grow that are not on this list, send me a message.

Trees:

- **Black willow (cuttings)**
- **Boxelder maple (seeds)**
- **Redbud (rescue plants from other areas)**
- White oaks (seeds)
- Cedar (rescue plants from other areas)
- Persimmon (seeds)

Understory shrubs:

- **Elderberry (cuttings)**
- **Red twig dogwood (cuttings)**
- Chokeberry (seeds)
- Beautyberry (cuttings)
- Buttonbush (cuttings)

Flowers:

- **Blazing star**
- **Butterfly milkweed**
- **Common milkweed**
- **Swamp milkweed**
- **Black-eyed susan**
- **Purple coneflower**
- **Plains coreopsis**
- **Anise hyssop**
- **Yarrow**
- **Blanketflower**
- **Bee balm**
- **Zinnias**
- **Cosmos**
- **Annual sunflower**
- Goldenrod
- Bergamot
- Cup plant
- Purple aster
- Maximillian sunflower

Grasses:

- **Little bluestem**
- **Indian grass**
